Glass / Mug Frosters

Underbar Equipment Super Deluxe Series

Patented Self-Cleaning Condenser

This product is equipped with a fine mesh filter to the front of the condenser to catch dust, and a rotating brush that moves up and down daily to remove excess buildup outward and away.

TBC-24SD-GF-N6

TBC-24SB-GF-N6

___ FEATURES & BENEFITS =__

Maintenance-free, Self-Cleaning Condenser (patented) Only at Turbo Air

The accumulation of dust in the condenser causes the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products in refrigerators. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

■ Hydrocarbon Refrigerants (R-600a)

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet the new standards of EPA and DOE in 2017. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to the global warming (ODP-0, GWP-3).

■ Stainless steel cabinet construction

Super Deluxe (SD) models boast a stainless steel exterior (except galvanized steel back and bottom). SB models are attractive wear-resistant black vinyl exterior. Heavy gauge stainless steel countertop and glide lids are perfect for sanitation and durability. Interior is stainless steel except galvanized steel top. Turbo Air glass froster model guarantees utmost in cleanliness and long product life. It also can add a touch of style to the most refined setting.

■ High-density polyurethane insulation

The entire cabinet structure is foamed-in-place using high density, CFC free polyurethane insulation.

- Manual defrost system
- Heavy duty, PE(Polyethylene) coated shelves
 Heavy duty 10mm thick pure grade PE coated shelves are provided for maximum storage use.
- Huge capacity cooler cabinet requires only minimum floor space
- Bottom mount compressor unit
- Glass / mug froster holds 5°F ~ 15°F for the best in chilling glasses and plates
